Activity: Use supplies that you already have (be creative) to decorate the room for a party! Then, use your paper hearts from earlier this week to tell how you've been a good friend to someone else and someone else has been a good friend to you. When you're finished, give your (paper) heart to someone else in the group to remind them of your friendship and Jesus' love for them.

Younger Track (Preschool-Grade 1)-

- Questions-
 - Tell about a time when you were left out and couldn't do something that others were doing.
 - Describe your best friend. What makes them a good friend? What do you do to be a good friend back to them?
 - What was the best part of VBS this week?

Older Track (Grades 2-6)-

- Questions-
 - Tell about a time when you were left out. How did it make you feel? What can you do when others are feeling left out?
 - Describe your best friend. What makes them a good friend? What do you do to be a good friend back to them?
 - What was the best part of VBS this week?

Day 5: Refrigerator Magnets

Supplies included in your kit:

- Glass stones
- Sticky-backed magnet strips
- Paint in paint pots (left over from Day 1)
- Paint pot with Mod Podge (labeled MP)
- Colored Paper with circles on it
- Examples of thumbprint drawings

Supplies not included:

- Scissors
- Fine point pen or marker (sharp pencil is OK too)
- Butter tub lid or paper plate to hold paint

What to do:

1. Pour a small amount (a few drops) of leftover paint from your paint pots onto a surface (butter tub lids work great for this, but paper plates or even a piece of paper will work just fine).
2. Spread the paint out thin by making circles in it with the flat part of your finger. When it is thinly spread your finger will be lightly coated with the paint. Now make a print with your painted finger inside a circle on your colored paper.
3. Continue doing this with a variety of paint colors until many of the circles on your paper are filled.
4. Let the finger prints dry before you go on. (this is a good time to look over the example page)
5. Using the examples provided and a fine point pen or marker, try to add details to your finger prints to turn them into animals, people, trucks, or space ships – use your imagination!
6. When your pictures are finished, cut out the circles.
7. Prepare the glass stones by dipping your clean finger into the paint pot marked “MP” (Mod Podge) and use your finger to coat the flat surface of the glass stone with a thin layer of Mod Podge. This will act like glue to attach the picture to the back of the stone.
8. Lay your cut-out thumb print picture on the table in front of you (image side up), then set the glass stone on top of the thumb print picture so the image is nicely centered. Press it down firmly to remove any air bubbles.
9. When the mod podge has dried, you may need to trim the paper circle.
10. Use scissors to cut a small square from the magnet strip (about $\frac{1}{4}$ - $\frac{1}{2}$ inch square), peel off the backing and press the sticky side of the magnet to the paper side of your stone.
